Odoo Applications	CRM, Sales, Purchase, Inventory, Website, Manufacturing, TimeOff, Email Marketing, Project, Payment, Employee
Languages	Python, SQL, JavaScript
Web Technologies	HTML, CSS, Bootstrap
Database	SQL Plus, PostgreSQL
Tools & APIs	Git, GitHub

WORK EXPERIENCE

Enzapps IT Solutions | Jr. Odoo Developer

May 2025 - Present

- Developed, migrated and customized Odoo modules using Python, XML, JavaScript, and PostgreSQL, supporting business operations across CRM, Sales, Purchase, Inventory, Accounting, Email Marketing, Website, Project, and Manufacturing.
- Contributed to a confidential, portal-based Odoo ERP application for approximately one year, developing and maintaining backend business logic and portal functionality using Odoo ORM, QWeb, Python, JavaScript, and PostgreSQL, including controllers, interactive UI components, responsive layouts, and backend-to-portal data flows.
- Developed custom Purchase and RFQ approval workflows, including approval mechanisms, secure token-based access, email integration, and vendor comparison functionality, along with invoicing, payments, credit notes, down-payment workflows and Outlook/Microsoft Graph API integration for email workflows.
- Developed custom ERP functionality across Inventory, Manufacturing (MRP), Purchase, Payments, and Project management using custom Odoo models, including stock moves, transfers, reservations, locations, quantity tracking, Manufacturing Orders, Bills of Materials, routes, purchase orders, payment workflows, and project management features.

- Contributed to Odoo module migration and customization.
- Gained hands-on experience with Odoo models, views, controllers, ORM, and module development.
- Trained students in Python and Odoo development, covering core concepts and module customization.

PROJECTS

Portal-Based Odoo ERP Application | Odoo

Contributed to the development and maintenance of portal-based ERP application, working on backend business logic, portal functionality, QWeb templates, controllers, and interactive web interfaces.

Hospital Management System | Django, Python

Developed a web-based hospital management system for managing patient records and healthcare-related operations.

Social Media Application | Django, Python

Developed a social media web application with user authentication, profile management, posts, likes, comments, follow/unfollow functionality, notifications, user search, and content sharing.

EDUCATION
